WORLD HAPPENINGS

BRIEFLY TOLD

Because crooks — some of them using wireless cars — have found how to tune-in police radio messages, it is likely that London police will transmit code.

The King and Queen received more than 300 archbishops and bishops from all corners of the globe attending the Lambeth Conference at the Anglican church in London.

The British Save the Children Fund will receive 50 per cent. of all clothing and bedding sent overseas this year by the Imperial Order Daughters of the Empire.

Many villagers in Singapore and neighboring islands are hearing radio programs for the first time, as a result of community listening sets, installed recently by the public relations office.

Proceeds of the exhibition of Princess Elizabeth's wedding presents now have been distributed to charities in Britain and the Dominions. The amount is estimated at nearly \$20,000 (\$80,000).

When H. F. Davies of London retired his family had completed 128 years in railway service. His grandfather served 30 years, his father 35 years, himself 50 years and his son 13.

PALMOUTH, England. — Two British concert pianists, Cyril Smith and his wife, Phyllis Sellick, were rescued from the Atlantic by the British submarine Andrew when Smith's yacht, Fast Lady, foundered in Pالمouth Bay.

CANADIAN OLYMPIC CONTINGENT — Canadian girls who compete in the Olympics in England, shown before leaving Montreal on a special train are: Pat Jones, New Westminster; Elaine Silburn, Vancouver; J. McNamee, Vancouver; V. King, Winnipeg; Irene Strong, Vancouver; Joyce Court, Montreal; Donna Gilmour, Vancouver; Diana Foster, Vancouver; and Doreen Dudge, Kelvington, Sask.

Wild Ducks And Geese Increase In Canada

WASHINGTON. — Northern nesting grounds are producing more wild ducks and geese this year than last, the United States Fish and Wildlife Service said.

"Compared to the favorable years of the past, the breeding grounds are still seriously under-populated," Albert Day, director of the service, said.

Day's summary of reports from waterfowl breeding areas in Canada: Manitoba — Varies from no change to very slight improvement. Early floods caused nesting losses in the large marshes and the river delta areas.

Saskatchewan — Noticeable but small improvement over 1947, especially in the southern short-grass plains. Some losses may be expected in the rapidly drying area southwest and west of Regina.

Alberta — A definite increase. Prospects for "a fair production" seem to be good.

Northern Canada — Improved production expected in the Lake Claire marshes and the Cordova Lake area. Breeding populations appear about the same as last year with the possibility of a moderate increase.

British Columbia — Production volume still in doubt due to severe floods. Cariboo district apparently has a reduced duck population.

DESERVED VICTORY

A Long Branch man put a burglar to flight by hurling an alarm clock and a piggy bank at him. He deserved the victory, to which he devoted both time and money.

In 1947 a blood bank for valuable horses, cows and dogs was opened.

CANADIAN CHAMPION — All smiles is Irene Strong, of Vancouver, Canadian champion swimmer on her way to the Olympics.

KITCHEN MEDITATIONS

A DOOR

By JANE DALE

Suddenly a door opens and through its shining portals a loved one steps. Gently the door closes and we are left behind to carry on the work allotted to us.

When our tears fall no more we know that beyond that door are our treasures, far richer than silver or gold — our treasures in Heaven.

Humbly and lovingly we labor on, making this world a little better for us having lived in it, until the shining door opens and we too step across the threshold.

Predicts Death Rate Increase

NEW YORK. — An increase in the death rate during the next 25 years is predicted by statisticians of the Metropolitan Life Insurance Company here.

By 1975 we shall have at least one and maybe four more deaths per 1,000 population each year than the 10 per 1,000 that we have now.

But the average American will be living several years longer than he does now, the statisticians figure. It is this increased life span, they explain, that will increase the death rate.

An increase in the average length of life means that there will be a larger proportion of older people in the population. This in turn will lead to a larger number of deaths per 1,000 population.

"If the present death rate of about 10 per 1,000 continued," the statisticians point out, "it would ultimately result in an average lifetime of 100 years. In the present state of our knowledge, to expect that the average person will live that long would be to indulge in wishful thinking."

"Actually, the average length of life in the United States is now close to 67 years. In a stationary population, the death rate corresponding to this figure would be about 15 per 1,000, a figure half again that currently being experienced."

The reason for the much more favorable death rate which now prevails lies in the high proportion of people at the childhood and early adult ages, the periods of life when mortality is lowest."

MARRIAGE SYSTEM

In the belief that the custom tends to perpetuate both the strength and wisdom of the tribe, the Octomacans, South America Indians, maintain a marriage system under which all girls are married to old widowers and all boys to old widows.

Weekly Tip

TOUGH MEAT

A little vinegar added to tougher meat cuts while cooking will make your meat more tender and will not affect the taste.

Alaskan Talented In Teeth Making

HALES, Alaska. — Stephen Sheldon, Sr., general store and hotel proprietor, isn't buffaloed by lack of a dentist. In fact the lack spurs him to achievement.

Sheldon's talents range from oil painting to sleight-of-hand and juggling stunts left over from vaudeville and circus days. Among other things, he carves curio out of native Alaskan ivory.

So, when he had a touch of flu and swollen upper gums, and was unable to wear his plate, he sat down and carved an upper row of teeth out of an old piece of ivory, naturally.

But this is only the beginning. "My next set," he said, "will be made of a novelty. I am going to put in mouth organ reeds so I can blow a tune while cooling my tea."

Health LEAGUE of CANADA presents TOPICS of VITAL INTEREST

COOKING SAFEGUARDS HEALTH OF HUMANITY

The human race long has protected itself from food-borne diseases by cooking—even the primitive methods had merit in this respect.

Today most foods usually are cooked well enough to kill any harmful or disease-producing germs that are in or may get in them, while food-handling practices—still a long way from perfection—are steadily improving.

There is one food in the world, however, which in its uncooked state probably has caused more disease, crippling and death than all other foods combined. That food is milk—the world's best all-around single item of diet.

And despite the fact that it is universally known that cooking kills harmful germs, most of the world's milk drinkers today probably drink uncooked—unpasteurized—milk.

In Canada, the situation is slowly changing for the better. One province—Ontario—has a milk pasteurization law which is 99 per cent. effective as far as sale of milk for human consumption is concerned. Many municipalities in the other provinces have enacted pasteurization-by-law and the list is growing steadily.

However, much milk consumed in Canada today is unpasteurized, and the Dominion's leading voluntary health education association — currently is campaigning to drive home to summer vacationists and summer resort operators throughout the nation that pasteurized milk is safe milk—that unpasteurized milk can be dangerous.

Science has proven that unpasteurized or raw milk can carry germs which cause such diseases as bovine tuberculosis, typhoid, paratyphoid, septic sore throat and undulant fever. Pasteurization kills such disease-potent bacteria—it makes milk safe for human consumption and does NO harm to its nutritive value.

Wheat as a food for man was cultivated as far back to 12000 B.C.

Cosmopolitan Hotel

One of Blairmore's most attractive hostilities is the Cosmopolitan Hotel, and its smart exterior has proved most inviting to visitors to the town, who

on entering have found that the interior is just as modern and attractive as the exterior.

All rooms in this hotel are comfortably furnished, tastefully decorated and have plenty of ventilation. They give the advantage of excellent service,

which is of the highest character and provide for most any want desired. At this hotel, "meat is king," meaning that when one registers their name as guest of this hotel they are at your service as long as one wishes to stay, be it overnight, for a week

or month, and a home resident is just as welcome as the travelling man. The Cosmopolitan Hotel is under the management of Mr. Wm. Rusnak, who has had many years experience in the hotel business. He realizes that to maintain a modern service and re-

ceive patrons from every station of life, it is necessary to have the prices within the reach of all. To prove that he has attained this object, it may be said that whenever a local hotel is mentioned, the Cosmopolitan Hotel is the one thought of.

FOOTPATH TO PEACE

To be glad of life because it gives
you the chance to love to work, and
to play—to look up at the stars; to
be satisfied with your possessions but
not contented with yourself until you
have the best of them.

To despise nothing in the world
except falsehood and meanness and to
fear nothing except cowardice.

To be governed by your admira-
tions, rather than by your disgusts.

To covet nothing that is your neigh-
bor's except his kindness of heart and
gentleness of manners.

To think seldom of your enemies,
often of your friends, and to spend as
much time as you can with body and
with spirit in God's out-of-doors.
These are little guide-posts in the
footpaths to peace.

MAN'S MEASUREMENTS

He treats his fellow-man!
This standard has his measure been
Since time itself began!

He's measured not by thy tithes or
creeds,

High-sounding though they be;
Nor by the gold that's put aside;
Nor by his sanctity!

He's measured not by social rank,
When character's the test;
Nor by this earthly pomp or show,
Displaying wealth possessed!

He's measured by his justice, right;
His fairness at his play.
His squareness in all dealings made,
His honest, upright way.

These are his measures, ever near
To serve him when they can;
For man's no bigger than the way
He treats his fellow-man.

Alberta Coal Tonnage for June 625,331

Alberta's coal output for June
showed an increase of nearly 34,000
tons over the output of the same per-
iod in 1947, according to a statement
issued by Chief Inspector of Mines
John Crawford. The output for the
bituminous field was 428,830 tons for
the month, compared with 403,743
tons for June last year, taken from
the 13 mines in the three groups un-
der this heading.

Increased output was therefore 25,-
087 tons for the month, the biggest
increase being noted from the Crows'
Nest area, but a big decrease in out-
put was noted from Coalpur in
Group 3, the deficit amounting to
16,770 tons.

In the sub-bituminous field, 195,-
501 tons was mined, most of this be-
ing produced at the Drumheller field,
where a total of 165,939 was recorded.

The increase in the total sub-bitumi-
nous output amounted to 8,674 tons,
Edmonton area showing decreased
production of over 2,000 tons. Most
mines in the sub-bituminous showed
slightly less output for the compara-

tive month, but other big increases
were shown at Tofield and Camrose.
Total output of coal in both sections
was 625,331 tons as against 591,570
tons for June, 1947, a total increase
of 33,761 tons—Calgary Albertan.

Born to Mr. and Mrs. Ivan Ander-
son (nee Rose Campo) at the General
hospital in Calgary on Friday, July
23, a daughter, Roxann June.

Mr. and Mrs. H. Pinkney and chil-
dren are leaving Thursday for a two
weeks vacation. They will motor to
Waterton, then on to Spokane and
other USA points.

The Michel Miners were blasted off
of the provincial baseball playoff
series 8-3 in the first game and 4-1
in the second to the Hillcrest All-
Stars. Blaimore met similar fate at
the hands of Coleman.

EVERYBODY'S BUSINESS

Many men use too much ner-
vous energy in their jobs. As
a result, their work suffers
both in quality and quantity.
And they feel completely ex-
hausted at the end of the day.

The most important reme-
dy for this trouble is to avoid
undue rush and strain.
Smooth efficiency should be
the objective in all jobs.

If you work with your
hands, don't be a banger,
slammer and yanker. Use
only the energy each opera-
tion requires. If your job is

ROAD-SENSE

Too Much Speed Is Dangerous

The speed limit on Alberta highways has been set at 55 miles an hour. At this speed you travel over 80 feet in one second. It is easy to see that a moment's inattention to the road may mean disaster. For safe driving, think, not of how fast you can drive, but of how fast you can stop.

Join the A.M.A. Without Delay

Membership in the A.M.A. brings many benefits, including free insurance, highway information, license service, travel routing and other valuable advantages—at only \$10 for 12 months. You should be a member. Your nearest A.M.A. branch will gladly furnish full information on request.

A driver with normal reflexes driving a car equipped with good brakes stops, under favorable conditions, in the following distances:

at 55 m.p.h. 170 feet
at 50 m.p.h. 155 feet
at 40 m.p.h. 115 feet
at 30 m.p.h. 75 feet
at 20 m.p.h. 45 feet

With slow reflexes, inefficient brakes, or slippery road conditions, the distances travelled are much greater. Watch your speed, watch the road, drive safely.

What MAKES a good citizen?

A good citizen respects himself... and respects the rights of others.

He avoids bigotry and intolerance.

He puts the welfare of his country and his community before his own advantage.

He is moderate in his thinking and moderate in his actions.

He is moderate in his use of luxuries.

Whatever the occasion, the good citizen knows, as the House of Seagram has so frequently pointed out, that he has a personal responsibility to himself, to his family and to his country, to be moderate in all things.

Men who Think of Tomorrow Practice Moderation Today!
